

# THE CONCRETE RESPONSIBLE SOURCING CERTIFICATION SYSTEM

The certificate of responsible sourcing shows the level to which a plant operates in an environmentally, socially and economically responsible way and certifies that it produces products that have minimal impact on the environment.

## CONCRETE IN NUMBERS

CONCRETE IS 100% RECYCLABLE!

## BENEFITS

- Show excellence as an industry
- Get recognition in 'green building labels' - i.e. LEED, BREEAM, DGNB
- Get recognition in 'green' procurement government policies and building rating systems
- Promote confidence among local communities
- Provide insight into the whole supply chain

## HOW IT WORKS

## WHY IS THE CSC IMPORTANT?

INDEPENDENT

The certificates are issued and audited by independent third party certification bodies

SUSTAINABLE BUSINESS DEVELOPMENT

Strengthens brand and reputation in the market by showcasing sustainable practices

CREDIBLE

The CSC certification system is used worldwide by large and small producers

## CERTIFICATES

## DID YOU KNOW?

The Pantheon is built using Roman unreinforced concrete and its dome is the **largest one in the world**

The concrete used in the Channel tunnel is contractually guaranteed to last **150 years**
